The Boy Who Would Live Forever

A Novel of Gateway *Tor Books*

In 1977 Frederik Pohl stunned the science fiction world with the publication of Gateway, one of the most brilliantly entertaining SF novels of all time. Gateway was a bestseller and won science fiction's triple crown: the Hugo, Nebula, and John W. Campbell Memorial awards for best novel. Now, more than twenty-five years later, Pohl has completed a new novel set in the Gateway universe. The Boy Who Would Live Forever has a sense of wonder and excitement that will satisfy those who loved Gateway and will delight new readers as well. In Gateway, long after the alien Heechee abandoned their space-station, Gateway (as humans

dubbed it) allowed humans to explore new worlds. The Heechee, alarmed by the alien Kugel whose goal was to destroy all organic lifeforms, had already retreated to the galactic core where they now lived in peace. Now, in *The Boy Who Would Live Forever*, humans with dreams of life among the stars are joining the Heechee at the core, to live there along with those humans and Heechee whose physical bodies have died and their minds stored in electronic memory so that their wisdom passes down through the ages. Their peace is threatened by the Kugel, who may yet attack the core. But a much greater threat is the human Wan Enrique Santos-Smith, whose blind loathing of the Heechee fuels an insane desire to destroy them and, incidentally, every living being in the galaxy. Stan and Estrella, two young people from Earth, went to Gateway looking for adventure, and found each other. They settle among the Heechee on Forested Planet of Warm Old Star Twenty-Four, never suspecting that they may be the last best hope to save the galaxy. But with allies like Gelle-Klara Moynlin--one of the galaxy's richest women, who isn't content to just have money, but wants to use her wealth for good, and machine mind Marc Antony--a wonderful chef to thousands of living and stored clients, they are destined to contend with Wan's terrible plan. Frederik Pohl has woven together the lives of these and other memorable characters to create a masterful new novel. The Last Theorem

A Novel *Del Rey*

Two of science fiction's most renowned writers join forces for a storytelling sensation. The historic collaboration between Frederik Pohl and his fellow founding father of the genre, Arthur C. Clarke, is both a momentous literary event and a fittingly grand farewell from the late, great visionary author of *2001: A Space Odyssey*. *The Last Theorem* is a story of one man's mathematical obsession, and a celebration of the human spirit and the scientific method. It is also a gripping intellectual thriller in which humanity, facing extermination from all-but-omnipotent aliens, the Grand Galactics, must overcome differences of politics and religion and come together . . . or perish. In 1637, the French mathematician Pierre de Fermat scrawled a note in the margin of a book about an enigmatic theorem: "I have discovered a truly marvelous proof of this proposition which this margin is too narrow to contain." He also neglected to record his proof elsewhere. Thus began a search for the Holy Grail of mathematics—a search that didn't end until 1994, when Andrew Wiles published a 150-page proof. But the proof was burdensome, overlong, and utilized mathematical techniques undreamed of in Fermat's time, and so it left many critics unsatisfied—including young Ranjit Subramanian, a Sri Lankan with a special gift for mathematics and a passion for the famous "Last Theorem." When Ranjit writes a three-page proof of the theorem that relies exclusively on knowledge available to Fermat,

his achievement is hailed as a work of genius, bringing him fame and fortune. But it also brings him to the attention of the National Security Agency and a shadowy United Nations outfit called Pax per Fidem, or Peace Through Transparency, whose secretive workings belie its name. Suddenly Ranjit—together with his wife, Myra de Soyza, an expert in artificial intelligence, and their burgeoning family—finds himself swept up in world-shaking events, his genius for abstract mathematical thought put to uses that are both concrete and potentially deadly. Meanwhile, unbeknownst to anyone on Earth, an alien fleet is approaching the planet at a significant percentage of the speed of light. Their mission: to exterminate the dangerous species of primates known as *homo sapiens*.

Platinum Pohl

The Collected Best Stories *Tor Books*

Frederik Pohl, the bestselling author of *The Boy Who Would Live Forever*, is famous for his novels, but first and foremost, he is a master of the science fiction short story. For more than fifty years he has been writing incisive, entertaining SF stories, several hundred in all. Even while writing his bestselling triple-crown (Hugo, Nebula, Campbell Award) novel *Gateway* and the other Heechee Saga novels, he has always written short fiction. Now, for the first time, he has gathered together the best of his many stories. Spanning the decades, these tales are in their way a living history of science fiction. Because Frederik Pohl has been on the frontlines of the field since the halcyon days of the late 1930s, and has written short stories in every decade since. And because he has always been a keen observer of the human condition and the world that is shaped by it, his stories reflect the currents of political movements, social trends, major events that have shaken the world . . . Yet at their core, all his stories are most acutely concerned with people. All sorts of people. Some are people you'll love, some you'll hate. But you will need to find out what happens to the people who inhabit these stories. Because Frederik Pohl imbues his characters with a depth and individuality that makes them as real as people you see every day. Of course, he also employs a mind-boggling variety of scientific ideas and science fictional tropes with which his characters must interact. And he does it all with seemingly no effort at all. That's some trick. Not everyone can do that . . . but that's why he was named a Grand Master of Science Fiction by

his peers in the Science Fiction Writers of America. Here are his two Hugo Award winning stories, "Fermi and Frost" and "The Meeting" (with C. M. Kornbluth), along with such classic novellas as the powerful "The Gold at the Starbow's End" and "The Greening of Bed-Stuy," and stories such as "Servant of the People," "Shaffery Among the Immortals," and "Growing Up in Edge City," all finalists for major awards. And dozens of other wonderful tales, like "The Mayor of Mare Tranq" and the provocative "The Day the Martians Landed" and many others. Altogether, a grand collection of thought-provoking, entertaining science fiction by one of the all-time greats! At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

Mars The Next Step *CRC Press*

The conquest of Earth's moon was merely a precursor to a more dramatic step forward, which will take men and women to an outpost that might eventually become a second home for the human race. Mars: The Next Step illustrates how the only feasible colonization of another planet in our solar system will be on Mars. The author addresses the various questions surrounding this theory with frank scientific caution that in no way obscures his vigorous enthusiasm and, above all, optimism for mankind's future in space. This vivid and entertaining book explores "terraforming" (planetary engineering), which could turn Mars into a more congenial environment for humans, both in terms of changing the harsh climate of the planet and the production of plants able to thrive there by means of genetic engineering. The book includes numerous diagrams of possible manned spacecraft, along with color pictures of Mars taken on previous unmanned missions.

In the far future, an Earth-born woman must negotiate with a fearsome mutant race: "On a par with Ursula LeGuin or Arthur C. Clarke" (Chicago Tribune). Two thousand years into the future, runaway pollution has made the earth uninhabitable except in giant biodomes. The society is an anarchy, with disputes mediated through the Machiavellian Committee for the

Revolution. Mars, Venus, and the moon support flourishing colonies of various political stripes. On the fringes of the solar system, in the gas planets, a strange, new, violent kind of human has evolved. In this unstable system, the anarchist Paula Mendoza, an agent of the Committee, works to make peace and ultimately protect her people in a catastrophic clash of worlds that destroys the order she knows.

"WE'RE GOING TO FIND OUT MORE, AND THEN WE'RE GOING TO FIGHT! It was enough to curdle the blood. Haendl was proposing to fight—against the invulnerable, the almost godlike Pyramids! Haendl stood up. "Tropile, that's what this is all about!" He gestured around him. "Guns, tanks, airplanes—it's going to be us against them. Never mind the Sheep; they don't count. It's going to be Pyramids and Wolves, and the Pyramids won't win. And then—" He was glowing, and the fever was contagious. Tropile felt his own blood begin to pound. Haendl hadn't finished his "and then—", but he didn't have to. It was obvious. And then the Earth would go back to its own solar system, and an end to the five-year cycle of frost and hunger. And then the Wolves would rule a world worth ruling. This is a work of fiction. All the characters and events portrayed in this book are fictional, and any resemblance

to real people or incidents is purely coincidental.
