State changes - States of matter - GCSE Chemistry (Single ... You can summarize the process of water changing from a solid to a liquid to a gas in this way: ice→water→steam. Because the basic particle in ice, water, and steam is the water molecule, the same process can also be shown as: Here the (s) stands for solid, the (l) stands for liquid, and the (g) stands for gas. Unlike water, most chemical substances don't have different names for the solid, liquid, and gas forms.

Matter that can change both shape and volume is called a gas. Some introductory chemistry texts name solids, liquids, and gases as the three states of matter, but higher level texts recognize plasma as the fourth state of matter. Like a gas, plasma can change its volume and shape, but unlike a gas, it can also change its electrical charge.
