(PDF) Constraint Solving and Planning with Picat

A CSP consists of a set of variables, each of which is defined over a domain, a set of constraints among the variables, and, optionally, an objective function. A solution to a CSP is a valuation of the variables that satisfies all the constraints and optimizes the objective function, if it exists. Chapters 2 and 3 are devoted to constraint modeling.

Constraint Solving and Planning with Picat

In order to use a solver, a constraint program must first import the solver module. A constraint pro- gram normally poses a problem in three steps: (1) generate variables; (2) generate constraints over the variables; and (3) call solve to invoke the solver in order to.
