Broadband Wireless Access Networks For

Broadband Wireless Access (BWA) technologies provide high-speed communication access by wireless means to consumer and business markets. License exempt Wireless Access Systems including Radio Local Area Networks (WAS/RLANs) represent the primary BWA technologies used for wireless internet access. With billions of

devices already in operation, and the rapid growth expected to continue for the foreseeable future, and the demand for greater throughput to support Gigabit internet access and ...

ETSI - Broadband Wireless Network, Wireless Access

Broadband Fixed Wireless Access. Fixed Wireless Access (FWA) providers (Wireless ISPs - WISPs) use specific frequencies of the radio spectrum to transmit their signals through the air (radio waves) and in a similar way to how mobile phone networks operate, doing away with wires. Most wireless ISPs only offer very limited coverage in specific/niche areas (e.g. rural villages), although their price and performance tends to be good.

Broadband Fixed Wireless Access and WiFi - WiMAX ...

The broadband wireless access is also an attractive option to network operators in geographically remote areas with no or limited wired network. The advantages in terms of savings in speed of deployment and installation costs are further motivation for broadband wireless access technologies. View chapter Purchase book
