Energy - NGSS Hub

The Energy Science Stations for Fourth Grade focuses on energy transfer and conservation of energy in moving and colliding objects, light energy, and the transfer of energy from electrical to other types of energy. The Energy Science Stations encompass Next Generation Science Standards PS3.A-D and ETS1.A. By working through this mega-set of stations, students gain a robust understanding of energy, energy transfer, and conservation of energy.

Energy Science Stations for Fourth Grade

Through nine lessons, students are introduced to a range of energy types —

electrical, light, sound and thermal — as well as the renewable energy sources of wind, hydro (water) and solar power.

Fourth grade performance expectations include PS3, PS4, LS1, ESS1, ESS2, ESS3, and ETS1 Disciplinary Core Ideas from the NRC Framework. Students are able to use a model of waves to describe patterns of waves in terms of amplitude and wavelength, and that waves can cause objects to move. Students are expected to develop understanding of the effects of weathering or the rate of

erosion by water, ice, wind, or vegetation.

4th Grade - Next Generation Science Standards

Within the Next Generation Science Standards (NGSS), there are three distinct and equally important dimensions to learning science. These dimensions are combined to form each standard—or performance expectation—and each dimension works with the other two to help students build a cohesive understanding of science over time.
