The Air Force has signed a deal with Trueface, a developer of computer vision systems, to provide facial recognition, license plate recognition and weapon detection for an unnamed air base.

Air Force hires Trueface for facial recognition on bases ...

Facial recognition systems attempt to identify a human face, which is three-dimensional and changes in appearance with lighting and facial expression, based on its two-dimensional image. To accomplish this computational task, facial recognition systems perform four steps. First face detection is used to segment the face from the image background.
