Human Geography

An Essential Introduction *John Wiley & Sons*

Revised, Extended, and Extensively Updated Text Uses Historical Geographical and Thematic Approach to Provide Undergraduates with a Firm Foundation in Human Geography Drawing on nearly three decades of instructional experience and a wealth of testing pedagogical innovations with students, Mark Boyle has revised and expanded this authoritative and comprehensive introduction to Human Geography. As with the First Edition, Boyle follows the premise that “history makes geography whilst geography makes history,” and that the key to studying the principal demographic, social, political, economic, cultural and environmental processes in any region in the world today is to look at how that region has been impacted by, and in turn has impacted, the story of the rise, reign, and decline of the West. Moreover he argues that Human Geography itself is best understood as both an intellectual endeavour and a historical, political, and institutional project. Informed by recent developments in post-colonial scholarship, the book covers key concepts, seminal thinkers, and influential

texts in the field. Although designed for the beginner student, Boyle does not shy away from ideas and debates often avoided in introductory texts, clearly communicating theory without condescension. In addition, he places human geography in its larger academic context, discussing the influences on the field from related subjects. Notable features in the Second Edition include: Extensive revision and updating of coverage of key ideas, developments, debates and case studies New chapter on uneven geographical development at different scales and development theory and practice Dedicated coverage of Covid-19s geographies New learning resources (figures, tables, plates, maps, Deep Dive boxes, etc.) throughout the text, plus learning objectives, essay questions, checklists summarizing key ideas, and guidance for further reading Updated and expanded companion website with MP4 and MP3 chapter-by-chapter lectures and PowerPoint slides for each chapter, new multiple-choice exam paper and additional essay-style exam questions, and a wide range of student tutorial exercises Human Geography: An Essential Introduction, Second Edition is an excellent foundational text for undergraduate courses in human geography, globalization, Western civilization, historiographies of intellectual thought, the grand public problems confronting humanity in the twenty first century, and other wider social science courses.

Exploring Human Geography

A Reader *Routledge*

A lively and stimulating resource for all first year students of human geography, this introductory Reader comprises key published writings from the main fields of human geography. Because the subject is both broad and necessarily only loosely defined, a principal aim of this book is to present a view of the subject which is theoretically informed and yet recognises that any view is partial, contingent and subject to change. The extracts selected are accessible and raise issues of method and theory as well as fact. The editors have chosen articles that not only represent main currents in the present flow of academic geography but which are also responsive to developments outside of the discipline. Their selection contains a mixture of established and recent writings and each section features a contextualizing introduction and detailed suggestions for further reading.

Approaching Human Geography

An Introduction to Contemporary Theoretical Debates *SAGE*

This introduction to the development of new theoretical

approaches to human geography sets out to explain the key features of these new approaches, and to trace their antecedents and implications. The authors also highlight points of comparison and contrast, inter-connection and dissimilarity. An introductory chapter describes and accounts for the theoretical diversity present within twentieth-century human geography, and particular attention is paid to the transition from environmental and regional approaches to the spatial science of the 1960s. This chapter then sets the stage for the later chapters, which deal systematically with different post-1960s approaches: Marxism, humanism, realism, structuration and postmodernism. Each of these chapters deals with the chronological development of the appropriate literature, describes the key claims and arguments, and then presents a worked example to illustrate the benefits and pitfalls of an approach in practice. A concluding chapter re-integrates the diverse themes and reflects briefly on possible future theoretical developments in human geography in the 1990s. The principal chapters of the book are framed by both a preface and an epilogue, which address questions about relativism in approaching human geography, while also stressing the need for continued commitment and critical sensitivity in geographical enquiry. The book is written in an easily accessible style with generous expositions of key claims and arguments, and thorough cross-referencing between chapters.

The Cultural Landscape

An Introduction to Human Geography *Prentice Hall*

Human Geography and Professional Mobility

International Experiences, Critical Reflections, Practical Insights *Routledge*

This book explores an innovative set of critical narratives, accounts and engagements by different authors about their professional mobility and how that relates to the discipline and their life experiences. Human Geography and Professional Mobility seeks to encourage, influence, and help students understand geographic concepts based on critical reflections, international experiences, and practical insight laid out in stories of real people, real geographers, and real college faculty, that students can relate to. This volume is less theoretical and more personal insight-based, wherein first-hand and personal accounts of practical experiences are explored, which renders the text supplementary reading for human geography, population geography, world geography, and migration/mobility classes. With critical navigation of spaces in response to several geographical questions, this book offers a novel perspective on professional mobility of geographers which will be of interest to students and academics in the fields of geography, tourism, sociology, and anthropology.

An Introduction to Population Geographies

Lives Across Space *Routledge*

An Introduction to Population Geographies provides a foundation to the incredibly diverse, topical and interesting field of twenty-first-century population geography. It establishes the substantive

concerns of the subdiscipline, acknowledges the sheer diversity of its approaches, key concepts and theories and engages with the resulting major areas of academic debate that stem from this richness. Written in an accessible style and assuming little prior knowledge of topics covered, yet drawing on a wide range of diverse academic literature, the book's particular originality comes from its extended definition of population geography that locates it firmly within the multiple geographies of the life course. Consequently, issues such as childhood and adulthood, family dynamics, ageing, everyday mobilities, morbidity and differential ability assume a prominent place alongside the classic population geography triumvirate of births, migrations and deaths. This broader framing of the field allows the book to address more holistically aspects of lives across space often provided little attention in current textbooks. Particular note is given to how these lives are shaped though hybrid social, biological and individual arenas of differential life course experience. By engaging with traditional quantitative perspectives and newer qualitative insights, the authors engage students from the quantitative macro scale of population to the micro individual scale. Aimed at higher-level undergraduate and graduate students, this introductory text provides a well-developed pedagogy, including case studies that illustrate theory, concepts and issues.

Horizons in Human Geography *Macmillan International Higher Education*

This study contains 20 specially commissioned essays which attempt to present a critical challenge to the philosophical

positivism of the "New Geography". The work attempts to shed light on the relationship between human agency and social and spatial structures.

Encyclopedia of Human Geography *SAGE Publications*

With more than 300 entries written by an international team of leading authorities in the field, the Encyclopedia of Human Geography offers a comprehensive overview of the major ideas, concepts, terms, and approaches that characterize a notoriously diverse field. This multidisciplinary volume provides cross-cultural coverage of human geography as it is understood in the contemporary world and takes into account the enormous conceptual changes that have evolved since the 1970s, including a variety of social constructivist approaches.

Qualitative Change in Human Geography *Elsevier*

Qualitative Change in Human Geography is a collection of studies that tackles concerns about human geography. The papers presented in the book deal with qualitative issues regarding human geography. The text contains eight different discussions that cover topics such as the direction of social practice research and the concept of people, society, and nature in social science. The book covers how economic and political interaction can explain the creation of spatial structure. The text discusses the explanatory theories and ideologies regarding the obsession of policymakers with the inner-city. The book will be of great interest to sociologists, psychologists, and individuals concerned with human geography.

Advanced Introduction to Marxism and Human Geography

Edward Elgar Publishing

The Advanced Introduction to Marxism and Human Geography explores the fundamental aspects of Marx's conceptualization of capital and of capitalist development, including value theory, the class relation, accumulation and the development of the capitalist division of labor. Kevin Cox goes beyond simplistic analysis to further engage with key concepts, and how their relationships with one another can illuminate the human geography of the world.

An Introduction to the Geography of Health *Routledge*

In the second edition of An Introduction to the Geography of Health, Helen Hazen and Peter Anthamatten explore the ways in which geographic ideas and approaches can inform our

understanding of health. The book's focus on a broad range of physical and social factors that drive health in places and spaces offers students and scholars an important holistic perspective on the study of health in the modern era. In this edition, the authors have restructured the book to emphasize the theoretical significance of ecological and social approaches to health. Spatial methods are now reinforced throughout the book, and other qualitative and quantitative methods are discussed in greater depth. Data and examples are used extensively to illustrate key points and have been updated throughout, including several new extended case studies such as water contamination in Flint, Michigan; microplastics pollution; West Africa's Ebola crisis; and the Zika epidemic. The book contains more than one hundred figures, including new and updated maps, data graphics, and photos. The book is designed to be used as the core text for a health geography course for undergraduate and lower-level graduate students and is relevant to students of biology, medicine, entomology, social science, urban planning, and public health.

Theory and Methods

Critical Essays in Human Geography *Routledge*

This volume tackles the complex terrain of theory and methods, seeking to exemplify the major philosophical, social-theoretic and methodological developments - some with clear political and ethical implications - that have traversed human geography since the era of the 1960s when spatial science came to the fore. Coverage includes Marxist and humanistic geographies, and their

many variations over the years, as well as ongoing debates about agency-structure and the concepts of time, space, place and scale. Feminist and other 'positioned' geographies, alongside poststructuralist and posthumanist geographies, are all evidenced, as well as writings that push against the very 'limits' of what human geography has embraced over these fifty plus years. The volume combines readings that are well-known and widely accepted as 'classic', with readings that, while less familiar, are valuable in how they illustrate different possibilities for theory and method within the discipline. The volume also includes a substantial introduction by the editor, contextualising the readings, and in the process providing a new interpretation of the last half-century of change within the thoughts and practices of human geography.

Techniques in Human Geography *Routledge*

The first concise guide to the purposeful use of techniques in human geography. Examining key techniques in detail - survey and qualitative, numerical, spatial and computer-based - the book draws on important case studies, such as the decennial census, to illustrate applications. The importance of up-to-date IT based techniques is particularly stressed, introducing widely recognised applications. A final section explores the Internet, which offers exciting new resources but also creates problems for researchers used to traditional academic fields.

INTRODUCTION TO HUMAN GEOGRAPHY

This book covers the entire syllabus of FYBSc Semester II. New course of Savitribai Phule Pune University, Pune effective from

June 2019 onwards. This book has been written to fulfill the basic concepts. Some of the features of the book are observation, perception, analysis, critical thinking and understand the relationship between culture and Human society.

Making Human Geography *Guilford Publications*

This book cogently examines how human geography has developed from a field with limited self-awareness regarding method and theory to the vibrant study of society and space that it is today. Kevin R. Cox provides an interpretive, critical perspective on Anglo-American geographic thought in the 20th and 21st centuries. He probes the impact of the spatial-quantitative revolution and geography's engagement with other social sciences, particularly in social theory. Key concepts and theories in the field are explained and illustrated with instructive research examples. Cox explores both how new approaches to human geography get constructed and what each school of thought has contributed to understanding the world in which we live.

Contested Worlds

An Introduction to Human Geography *Routledge*

Contested Worlds provides an introduction both to a multitude of geographical worlds which are currently being actively constructed and contested, and to a range of different perspectives on these worlds being adopted and contested by geographers. It is unique in its focus on the role of contestation in both the construction of geographical studies and in the

geographies these studies seek to address. These issues are explored through a combination of general theoretical discussion and detailed international case studies. The areas discussed range in scale from the global, through the regional and national to the local worlds of the inner city, the neighbourhood and the village, with connections drawn between these scales. The book concludes that geography is being made in quite different ways. It asserts that geography is intrinsically a contested enterprise, and that this should be embraced as part of geographers becoming more critically involved in the making, and studying, of new contemporary human geographies.

Human Geography

A History for the Twenty-First Century *Routledge*

'Human Geography' examines the major trends, debates, research and conceptual evolution of human geography during the twentieth century. Considering each of the subject's primary subfields in turn, it addresses developments in both continental European and Anglo-American geography, providing a cutting-edge evaluation of each. Written clearly and accessibly by leading researchers, the book combines historical astuteness with personal insights and draws on a range of theoretical positions. A central theme of the book is the relative decline of the traditional subdisciplines towards the end of the twentieth century, and the continuing movement towards interdisciplinarity in which the various strands of human geography are seen as inextricably linked. This stimulating and exciting new book provides a unique insight into the study of geography during the twentieth century,

and is essential reading for anyone studying the history and philosophy of the subject.

An Introduction to Human Geography

The Cultural Landscape *Pearson*

Practising Human Geography *SAGE*

'Filling an enormous gap in the geographic literature, here is a terrific book that shows us how to think about and practice human geographic research' - Professor Jennifer Wolch, University of Southern California 'Practising Human Geography lucidly, comprehensively, and sometimes passionately shows why methodology matters, and why it is often so hard. To choose a method is to choose the kind of geographical values one wants to uphold. You need to get it right. These authors do' - Trevor Barnes, University of British Columbia 'Practising Human Geography is a godsend for students. Written in an accessible and engaging style, the book demystifies the study of geographical methodology, offering a wealth of practical advice from the authors' own research experience. This is not a manual of approved geographical techniques. It is a reflexive, critical and highly personal account, combining historical depth with up-to-the-minute examples of research in practice. Practising Human

Geography is a comprehensive and theoretically informed introduction to the practices of fieldwork, data collection, interpretation and writing, enabling students to make sense of their own data and to develop a critical perspective on the existing literature. The book makes complicated ideas approachable through the effective use of case studies and a firm grasp of contemporary debates' - Peter Jackson, Professor of Human Geography, University of Sheffield Practising Human Geography is a critical introduction to key issues in the practice of human geography, informed by the question 'how do geographers do research?' In examining those methods and practices that are essential to doing geography, the text presents a theoretically-informed discussion of the construction and interpretation of geographical data - including: the use of core research methodologies; using official and non-official sources; and the interpretative role of the researcher. Framed by an overview of how ideas of practising human geography have changed, the twelve chapters offer a comprehensive and integrated overview of research methodologies. The text is illustrated throughout with text boxes, case studies, and definitions of key terms. Practising Human Geography will introduce geographers - from undergraduate to faculty - to the core issues that inform research design and practice.

Contemporary Human Geography

"Contemporary Human Geography" is a beautifully crafted, modular springboard into essential human and cultural geography concepts, designed for the contemporary geography student. This brief, innovative text explores current human geography in the bold visual style that distinguishes Dorling Kindersley (DK) publications. Topics within each chapter are organized into modular, self-contained, two-page spreads. Together with the graphics, Rubenstein's efficient writing engages students, presenting information clearly without sacrificing the high-quality geography content essential to students and instructors.
