Womens Global Health And Human Rights

Pregnant women are also at heightened risk of infectious diseases like cholera that spread in displacement camps. Climate change threatens the health of women more broadly still, in times of both peace and conflict, according to the US National Institute for Health.

Why Climate Change Disproportionately Affects Women

20 June 2013 | Geneva - Physical or sexual violence is a public health problem that affects more than one third of all women globally, according to a new report released by WHO in partnership with the London School of Hygiene & Tropical Medicine and the South African Medical Research Council. The report, Global and regional estimates of violence against women: Prevalence and health effects of intimate partner violence and non-partner sexual violence, represents the first systematic study of ...

WHO | Violence against women: a 'global health problem of ...

Violence against women – particularly intimate partner violence and sexual violence – is a major public health problem and a violation of women's human rights. Global estimates published by WHO indicate that about 1 in 3 (35%) of women worldwide have experienced either physical and/or sexual intimate partner violence or non-partner sexual violence in their lifetime.

Violence against women - World Health Organization

Global Fund for Women believes that a woman's ability to access comprehensive sexuality education, control her own body, and access the health services she needs— regardless of her sexuality, where she lives, her income level, or her ethnicity—is a fundamental right.

Women Health Issues: Reproductive Health and Rights

Some of these health issues have never existed in the West, and others science eradicated decades ago. Maternal mortality, female genital cutting, child marriage, human immunodeficiency virus (HIV)/AIDS, and cervical cancer are a few of the issues that plague developing nations.' (Introduction to Global Women's Health)
