Level: 2 Background Swing trading is a type of trading aimed at making short to medium term profits from a trading pair over a period of a few days to several weeks. Swing traders mainly use technical analysis to look for trading opportunities. In addition to analyzing price trends and patterns, these traders can also use fundamental analysis.

Swingtrading — Indicators and Signals — TradingView — UK

As I noted in my first trading lesson, technical analysis can only increase the probability of your making a correct swing trading decision. Nothing is 100% accurate, and there is no such thing as "free money." Great trading opportunities, however, do have signatures.

Swing Trading: Top Strategies for Technical Analysis ...

Technical Analysis for Swing Trading. Swing trading is a perfect match for option trading, because the time periods involved are short (2-10 days), and this means that the effects of time decay on an option contract are minimised. As with any trading technique, it is possible to over analyse, and this leads to bad trading or no trading!

Technical Analysis for Swing Trading

Swing trading is a trading method that tries to achieve a stock gain over a time period of a few days to weeks, unlike day trading which occurs at a much shorter time. Even if some trades may last longer than a few weeks or months, some may still consider them as swing trading instead of trend trading. Ultimately, this style of trading seeks to seize a chunk of a possible price move, regardless of how volatile it may be.
