Testing Statistical Hypotheses Of Equivalence

While continuing to focus on methods of testing for two-sided equivalence, Testing

Statistical Hypotheses of Equivalence and Noninferiority, Second Edition gives much more attention to noninferiority testing. It covers a spectrum of equivalence testing problems of both types, ranging from a one-sample problem with normally distributed observations of fixed known variance to problems involving several dependent or independent samples and multivariate data.

Testing Statistical Hypotheses of Equivalence ...

Equivalence for the test is defined by a range of values that you specify (also called the equivalence interval). The hypotheses for the test are as follows: Null hypothesis (H_0): The difference between the means is outside your equivalence interval. The means are not

equivalent. Alternative hypothesis (H_1): The difference between the means is inside your equivalence interval. The means are equivalent.
