Introduction to Piping Engineering

In many engineering organizations a piping discipline is organized into two groups, namely piping engineering and piping design. The engineering group is mainly involved with piping material specifications, piping materials and stress analysis whereas the design group is involved with plant layout, equipment layout and piping layout.

What is Piping Engineering and Design

Our piping licensed engineers specialize in performing Pipe Stress Analysis, Structural and Failure Analyses and Seismic Analysis on industrial and commercial pipelines and mechanical components based on ASME, AISC. and ASCE/IBC and other applicable standards, utilizing advanced Finite Element Method. Our seismic engineers use the latest CAE technology to analyse and develop your Pipelines, boilers, cooling towers based on the applicable codes and standards.
