Machine Learning And Interpretation In
Understanding Model Interpretation As mentioned above model interpretability tries to understand and explain the steps and decision a machine learning model takes when making predictions. It gives us the ability to question the model's decision and learn about the following aspects. What features/attributes are important to the model?

Machine learning has great potential for improving products, processes and research. But computers usually do not explain their predictions which is a barrier to the adoption of machine learning. This book is about making machine learning models and their decisions interpretable. After exploring the concepts of interpretability, you will learn about simple, interpretable models such as decision trees, decision rules and linear regression.

This course will provide an understanding of how Machine Learning for interpretation is being utilized today and provide insights on future directions and trends.

The Holy Grail of Machine Learning in Seismic Interpretation
The first step in a multi-attribute machine-learning interpretation workflow is the identification of the problem to resolve by the geoscientist. This is important because depending on the interpretation objective (facies, stratigraphy, bed thickness, DHIs, etc.), the appropriate set of attributes must be chosen.

A (non-mathematical) definition I like by Miller (2017) 3 is: Interpretability is the degree to which a human can understand the cause of a decision. Another one is: Interpretability is the degree to which a human can consistently predict the model's result 4. The higher the interpretability of a machine learning model, the easier it is for someone to comprehend why certain decisions or predictions have been made.
