Buzz Aldrin, What Happened to You in All the Confusion?

A Novel *Seven Stories Press*

A Kirkus Reviews Best Fiction Title of 2011 In *Buzz Aldrin, What Happened to You in All the Confusion?*, readers follow a man who wishes not to be followed, a man who, after a series of personal and professional disasters, finds himself lying on a rain-soaked road in the desolate, treeless Faroe Islands, population only a few thousand, a wad of bills in his pocket and no memory of how he had come to be there. From there, Brage Award-winning author and playwright Johan Harstad's debut novel--previously published to great success in eleven countries with its first English-language appearance in June 2011--tells the story of Mattias, a thirty-something gardener living in Stavanger, Norway, whose idol is Buzz Aldrin, second man on the moon: the man who was willing to stand in Neil Armstrong's shadow in order to work, diligently and humbly, for the success of the Apollo 11 mission. Through Harstad's "delectably light but nonetheless impactful prose . . . [t]he novel's finest moments wrap you up in communion with Mattias, as if you are spending a quiet afternoon with an old friend, chatting but mostly thinking" (Three Percent). Surrounded by a vivid and memorable cast of characters--aspiring pop musicians, Caribbean-obsessed psychologists, death-haunted photographers, girls who dream of anonymous men falling in love with them on bus trips, and even Buzz Aldrin

himself--"Harstad combines formal play and linguistic ferocity with a searing emotional directness" (Dedi Felman, *Words Without Borders*) to bring Mattias to the realization that he cannot always blend into the background.

In the evenings, her father regales her with old folktales of the Jade Dragon and the Old Man on the Moon, who knows the answers to all of life's questions. The Malazan Empire simmers with discontent, bled dry by interminable warfare, bitter infighting and bloody confrontations with the formidable Anomander Rake and his Tiste Andii, ancient and implacable sorcerers. Even the imperial legions, long inured to the bloodshed, yearn for some respite. Yet Empress Laseen's rule remains absolute, enforced by her dread Claw assassins. For Sergeant Whiskeyjack and his squad of Bridgeburners, and for

Tattersail, surviving cadre mage of the Second Legion, the aftermath of the siege of Pale should have been a time to mourn the many dead. But Darujhistan, last of the Free Cities of Genabackis, yet holds out. It is to this ancient citadel that Laseen turns her predatory gaze. However, it would appear that the Empire is not alone in this great game. Sinister, shadowbound forces are gathering as the gods themselves prepare to play their hand... 168 Hours

You Have More Time Than You Think *Penguin*

There are 168 hours in a week. This book is about where the time really goes, and how we can all use it better. It's an unquestioned truth of modern life: we are starved for time. With the rise of two-income families, extreme jobs, and 24/7 connectivity, life is so frenzied we can barely find time to breathe. We tell ourselves we'd like to read more, get to the gym regularly, try new hobbies, and accomplish all kinds of goals. But then we give up because there just aren't enough hours to do it all. Or else, if we don't make excuses, we make sacrifices. To get ahead at work we spend less time with our spouses. To carve out more family time, we put off getting in shape. To train for a marathon, we cut back on sleep. There has to be a better way-and Laura Vanderkam has

found one. After interviewing dozens of successful, happy people, she realized that they allocate their time differently than most of us. Instead of letting the daily grind crowd out the important stuff, they start by making sure there's time for the important stuff. They focus on what they do best and what only they can do. When plans go wrong and they run out of time, only their lesser priorities suffer. It's not always easy, but the payoff is enormous. Vanderkam shows that it really is possible to sleep eight hours a night, exercise five days a week, take piano lessons, and write a novel without giving up quality time for work, family, and other things that really matter. The key is to start with a blank slate and to fill up your 168 hours only with things that deserve your time. Of course, you probably won't read to your children at 2:00 am, or skip a Wednesday morning meeting to go hiking, but you can cut back on how much you watch TV, do laundry, or spend time on other less fulfilling activities. Vanderkam shares creative ways to rearrange your schedule to make room for the things that matter most. 168 Hours is a fun, inspiring, practical guide that will help men and women of any age, lifestyle, or career get the most out of their time and their lives.

Eighteen years old, pregnant, and working as a pizza delivery girl in

Her world is further upended when she becomes obsessed with Jenny, a stay-at-home mother new to the neighborhood, who comes to depend on weekly deliveries of pickled-covered pizzas for her son's happiness. As one woman looks toward motherhood and the other toward middle age, the relationship between the two begins to blur in strange, complicated, and ultimately heartbreaking ways. The Moon and Beyond *Theogony Books*

Ian Stevens, director of the Deep Space Research Institute, isn't interested in conducting research just for the sake of research. While the rest of the world—including the U.S. government—thinks that's the DSRI's sole mission, Stevens is actually interested in more—he wants manned space travel and the colonization of the moon. With NASA defunct, few scientific probes are being launched, and no one even talks about human spaceflight anymore. Stevens is out to change that. A billionaire in his own right, Stevens has assembled a crew of the best scientists and engineers he can find, and the DSRI is secretly building and testing gravity-powered spacecraft. There's just one problem—the project would be widely condemned worldwide, especially since there's no government supervision. Everything they do has to be kept out of sight and away from the prying eyes of the NSA, Homeland Security, the IRS, OSHA, and a half-dozen other government agencies. They've got the world's smartest computer on their side, but will it be enough? As the government gets ever closer to figuring out what the DSRI is doing, Stevens' plan to

establish a permanent settlement on the Moon nears fruition. The race is on—will the government find out and shut down the project, or will Stevens be able to implement the Lunar Free State?

The Moon and Sixpence *Standard Ebooks*

The Moon and Sixpence tells the story of English stockbroker Charles Strickland, who abandons his wife and child to travel to Paris to become a painter. First published in 1919 in the United Kingdom by Heinemann, the story is inspired by the life of the French artist Paul Gauguin. It's told in episodic form from a first-person perspective. The narrator, who came to know Strickland through his wife's literary parties, begins the story as Strickland leaves for Paris. Strickland's new life becomes a stark contrast to his life in London. While he was once a well-off banker living a comfortable life, he must now sleep in cheap hotels while suffering both illness and hunger. Maugham spent a year in Paris in 1904, which is when he first heard the story of Gauguin, the banker who left his family and profession to pursue his passion for art. He heard the story from others who had known and worked with Gauguin. Ten years later Maugham travelled to Tahiti where he met others who had known Gauguin during the artist's time there. Inspired by the stories he heard, Maugham wrote *The Moon and Sixpence*. Although based on the life of Paul Gauguin, the story is a work of fiction. This book is part of the Standard Ebooks project, which produces free public domain ebooks.

Midsummer Moon *Open Road Media*

A duke's well-ordered world is turned upside down when a female inventor sends his heart soaring in this Regency romance by a New York Times–bestselling author. Merlin Lambourne has invented the “speaking box”—a sort of telephone—which is so valuable that Napoleon has killed for it. Sent by the crown to bring both inventor and invention to safety, Ransom Falconer, Duke of Damerell, is shocked to learn Mr. Lambourne is a Miss. Perhaps more shocking, however, are his feelings for the eccentric genius. She is everything he doesn't like: incapable of following orders, unaware of conventional etiquette, preoccupied, disorganized, and unkempt. Yet she beguiles him. One of the most ingenious inventors in England, she is also one of the country's greatest hopes in the defense against the power mad Napoleon Bonaparte. Now, if he could just get her mind out of the clouds and convince her to marry him . . . Merlin is not absentminded, it's just that she only seems to be able to pay attention to one thing at a time. And maybe she does take everything people say literally, but people ought to say what they mean. Now this Ransom Falconer wants her to forget her current interest in flying machines and focus on the speaking box she's lost interest in finishing. It's quite disconcerting. In fact, everything about him is disconcerting; in her isolated life Merlin has never met anyone who affects her quite like Ransom does. With her trademark blend of heartwarming characters and a hilarious conflict, *Midsummer Moon* is yet another winner from the author of *Flowers from the Storm*, praised by Lisa Kleypas as “the gold standard in historical romance.”
