In type 1 diabetes (which used to be called insulin-dependent diabetes or juvenile diabetes), the pancreas can't make insulin. The body can still get glucose from food but the glucose can't get into the cells where it's needed. Glucose stays in the blood, which makes the blood sugar level very high and causes health problems.

Type 1 diabetes is a serious condition where your blood glucose (sugar) level is too high because your body can't make a hormone called insulin. This happens because your body attacks the cells in your pancreas that make the insulin, meaning you can't produce any at all. We all need insulin to live. It does an essential job.
