b. In the end, you need an empirical model, so the theoretical model you develop must lead somehow to what you are testing. You will need to address how, say, the regression you are running is a linear form of an equation from your optimization problem. Be explicit about how the empirical model differs from the theoretical model, e.g. if you are

Empirical research is research using empirical evidence. It is also a way of gaining knowledge by means of direct and indirect observation or experience. Empiricism values some research more than other kinds. Empirical evidence can be analyzed quantitatively or qualitatively. Quantifying the evidence or making sense of it in qualitative form, a researcher can answer empirical questions, which should be clearly defined and answerable with the evidence collected. Research design varies by field an
