Moral distress occurs when one knows the ethically correct action to take but feels powerless to take that action. Research on moral distress among nurses has identified that the sources of moral distress are many and varied and that the experience of moral distress leads some nurses to leave their jobs, or the profession altogether.

Understanding and Addressing Moral Distress

Turning to the American Nurses Association (ANA) Code of Ethics for Nurses with Interpretive Statements during the pandemic may help nurses shift our focus and decrease moral distress. During a pandemic, we move away from a focus on relationship-centered care (Provision 2, Commitment to Patient) and adopt an outcome-based framework (Provision 8, Promotion of Community and World Health) with the two primary goals mentioned earlier: Use strategies to avoid entering crisis standards of care and ...

Ethics in a pandemic - American Nurse

Moral distress can occur in two stages: "initial distress" occurs at the time of the problem, while "reactive distress" occurs later. 5 Even after the reactive stress dissipates, it can leave a "moral residue" causing a cumulative negative stress effect. The way moral distress undermines moral integrity is somewhat vague (perhaps intentionally), but it points to the ways in which transgressing moral values undercuts one's sense of self.

Dental care: ethics in dentristry part III- ethical ...

Moral distress was originally defined as occurring "when one knows the right thing to do, but institutional constraints make it nearly impossible to pursue the right course of action." 1 Most nurses can give examples of personal moral distress because several issues in healthcare increase the risk of it. First, there's the disconnect between nursing education (where students are taught the ideal) and the real world of nursing (where compromises about what should be done and what can be done ...
