How to Acquire the Right Business *Xlibris Corporation*

Buying a company is a demanding, complex process requiring a wide range of skills and abilities. If you understand this process thoroughly, then you are far more likely to make the right purchase decision. Whether you are buying the corner ice cream parlor or a \$100 million business, following certain steps will enhance your chances of successfully operating a profitable venture once the deal is closed. This book should help you to visualize what really goes on in the making of a business deal. Basis for the Book Information for the book is drawn from several sources. The book heavily reflects the first hand, practical experience in deal-making by the author Dr. John Psarouthakis. He has led the buying process for about 40 acquisitions and has been a part of a team of a dozen others during his business career as an entrepreneur and business executive. Most of his direct experience comes from purchasing and selling deals for his own two companies, J.P. Industries, Inc and JPE, Inc. In the 1980's. Psarouthakis founded and built J.P. Industries into a Fortune 500 company by acquiring underperforming auto parts and plumbing products manufacturers, selling the company to a British conglomerate, T&N, PLC, in 1990. Next, he founded JPE, Inc., which manufactured and distributed auto and truck parts for OEM and the aftermarket. Although. Psarouthakis' experience draws heavily on the manufacturing and distribution of durable goods sectors, many aspects of the process are the same, regardless of the industry. Interviews conducted by co-author Lorraine Uhlaner with entrepreneurs involved in retailing, service and construction sectors and other published information about the acquisitions process also influence the content of this book. The Importance of Careful Planning A carefully planned and executed search process is likely to improve

your odds of finding a company with which you can be successful. Too often, people rush into deals only to find out later that they did not purchase what they had expected. They suffer negative business consequences, such as lower than anticipated profits and sales, as a result. The alternative, careful planning, may cost more initially, and require more effort, but is likely to lead to better business results in the long run. Various studies have found that as high as 60% of acquisitions made fail to meet the acquisition performance goals, ROI, ROE, etc., that were set at the closing and which influenced significantly the price paid. Just 25% met or exceeded those goals; the remaining 15% were indeterminate. There is one overriding reason for this high rate of failure and that is overpaying for the acquired company. Overpayment is a result of 1) an overoptimistic expectation of the market, 2) a higher than realistic estimate of internal improvements/developments, and 3) allowing oneself into a horserace leading to an overprice, due to the bidding process that the seller has succeeded to establish.
