Giant Serpentine Intracranial Aneurysm: A Case Report

Giant cerebral aneurysms account for ~5% of all intracranial aneurysms 1,3. They occur in the 5th-7th decades and are more common in females 2. Clinical presentation. Patients can present with symptoms and signs of mass effect or subarachnoid hemorrhage 1,2. Pathology

Giant cerebral aneurysm | Radiology Reference Article ...

Giant aneurysms are found in all locations throughout the intracranial vascular tree with ICA being the most common site. In our case, the patient had a giant supraclinoid segment aneurysm which had ruptured. The exact incidence of giant aneurysm in pregnancy is not known as it a rare lesion even in nonpregnant cases.

Intracranial hemorrhage from giant aneurysm in pregnancy ...

Giant intracranial aneurysms (GIAs) are associated with a high risk of rupture and have a high mortality rate when they rupture (65-100%). The traditional microsurgical approach to secure these lesions is challenging, and as such endovascular embolization has been increasingly selected as a treatment option.

Endovascular Treatment of Giant Intracranial Aneurysms

A case is presented which documents the formation of a giant intracranial aneurysm over a period of less than three months. It had previously been postulated by several authors that giant aneurysms form from haematomas in communication with the aneurysm. The gross appearance and histology of the lesion in our case supports this theory.
