Weibull++ (Version 7.1.4 and above) now offers a usage-based warranty feature in addition to its previously existing selection of warranty analysis data formats. This feature automates the analysis procedure described above, thereby facilitating a process that would be quite tedious otherwise, particularly when dealing with large warranty data sets.

Usage-Based Warranty Analysis - Reliability Engineering

In addition, information gathered using a Weibull Analysis allows the manufacturer to plan for any known costs or set the proper warranty terms. Weibull Analysis is an effective method of determining reliability characteristics and trends of a population using a relatively small sample size of field or laboratory test data.
