The Male Reproductive System: Organs,

Function, and More

Several different organs and structures make up the male reproductive system. These include: The scrotum, or scrotal sac. This is the loose bag of skin which hangs under the main body cavity between the upper thighs. It is divided into two, and each side contains one testicle (testis). The testicles (testes). There are two testes.

The Human Reproductive System | Teaching Resources

The male reproductive system consists of a number of sex organs that play a role in the process of human reproduction. These organs are located on the outside of the body and within the pelvis. The main male sex organs are the penis and the testicles which produce semen and sperm, which, as part of sexual intercourse, fertilize an ovum in the female's body; the fertilized ovum develops into a fetus, which is later born as

an infant. The corresponding system in females is the female reproductive

Male reproductive system - Wikipedia

Dog anatomy is not very difficult to understand if a labeled diagram is present to provide a graphic

illustration of the same. That is exactly what you will find in this DogAppy article. It provides information about a dog's skeletal, reproductive, internal, and external anatomy, along with accompanying labeled diagrams.
