Journal. 1. What are the objectives for this experiment? (you can summarize) The objective for this experiment was to observe the growth of p.aurelia, p.caudatum, and a mixture of the two over a 16 day period.

Virtual Lab: Population Biology - Google Docs

This lab uses the glenco simulator, Virtual Lab: Population Biology to collect data on two populations of paramecium, P. caudatum and P. aurelia. Though the simulator doesn't expressly say it, the activity illustrates the competitive exclusion principle by showing students how each population behaves when grown alone or when mixed together. In the mixed culture, one of the populations does not survive.

Like the individual organism, the population is a real and functional unit in biology. Defined as groups of organisms that are genetically and spatially distinct from other such groups, the population is the fundamental unit of evolution. Populations are dynamic, they grow, decline, colonize new populations, and go extinct.
