Abstract: With rapid expansion of scientific papers, making a survey from a large collection of papers on a given research issue or domain becomes more and more important for researchers. This paper proposes a template-based framework for automatically generating survey paper. It allows users to compose a template tree as a syllabus for the required survey.

No longer endorsed by the IEEE. The need for standard terminology in the field of automatic generation control (AGC) became apparent when it was noted that authors of technical papers covering this technology frequently used different terms to convey identical meanings. This inconsistency of terms and requests for standardization from operating organizations of interconnected power systems in both the United States and Canada led to the original development of these definitions.

On Area Control Errors, Area Injection Errors, and Textbook Automatic Generation Control. Abstract: We reexamine and critique the classical area control error concept used in automatic generation control, and propose a new error signal termed the area injection error.
