How Droughts and Die-offs, Heat Waves and Hurricanes Are Converging on America *Thomas Dunne Books*

Bustle's "17 Best Nonfiction Books Coming Out In September 2018" "With This is the Way the World Ends Jeff Nesbit has delivered an enlightening - and alarming - explanation of the climate challenge as it exists

today. Climate change is no far-off threat. It's impacting communities all over the world at this very moment, and we ignore the scientific reality at our own peril. The good news? As Nesbit underscores, disaster is not preordained. The global community can meet this moment — and we must." —Senator John Kerry

A unique view of climate change glimpsed through the world's resources that are disappearing. The world itself won't end, of course. Only ours will: our livelihoods, our homes, our cultures. And we're squarely at the tipping point. Longer droughts in the Middle East. Growing desertification in China and Africa. The monsoon season shrinking in India.

Amped-up heat waves in Australia. More intense hurricanes reaching America. Water wars in the Horn of Africa. Rebellions, refugees and starving children across the globe. These are not disconnected events. These are the pieces of a larger puzzle that environmental expert Jeff Nesbit puts together. Unless we start addressing the causes of climate change and stop simply navigating its effects, we will be facing a series of unstoppable catastrophes by the time our preschoolers graduate from college. Our world is in trouble — right now. This is the way the world ends. *Way the World Ends* tells the real stories of the substantial impacts to Earth's systems unfolding across each

continent. The bad news? Within two decades or so, our carbon budget will reach a point of no return. But there's good news. Like every significant challenge we've faced—from creating civilization in the shadow of the last ice age to the Industrial Revolution—we can get out of this box canyon by understanding the realities and changing the worn-out climate conversation to one that's relevant to every person. Nesbit provides a clear blueprint for real-time, workable solutions we can tackle together.

Inevitably, the bombs fall, and our hero finds himself imprisoned on a submarine headed for Antarctica, where he and five other survivors will stand

trial for “crimes against humanity.” George Paxton’s accusers are no ordinary plaintiffs: They are “the unadmitted,” potential people whose hypothetical lives were canceled in consequence of humankind’s self-extinction. In the months that follow, George’s dark journey will take him through the hellscape that was once the Earth, through a human past that has become as unthinkable as the human future, to his day in court before the South Pole tribunal, and finally into the intolerable heart of loss. No hope. Just six precious months until impact. The Last Policeman presents a fascinating portrait of a pre-apocalyptic United States. The economy spirals downward while crops rot in the fields.

Churches and synagogues are packed. People all over the world are walking off the job—but not Hank Palace. He's investigating a death by hanging in a city that sees a dozen suicides every week—except this one feels suspicious, and Palace is the only cop who cares. The first in a trilogy, *The Last Policeman* offers a mystery set on the brink of an apocalypse. As Palace's investigation plays out under the shadow of 2011GV1, we're confronted by hard questions way beyond "whodunit." What basis does civilization rest upon? What is life worth? What would any of us do, what would we really do, if our days were numbered? Ebook contains an

excerpt from the anticipated second book in the trilogy, *Countdown City*.

The Warehouse

A Novel *Ballantine Books*

Paxton never thought he'd be working for Cloud, the giant tech company that's eaten much of the American economy. Much less that he'd be moving into one of the company's sprawling live-work facilities. But compared to what's left outside, Cloud's bland chainstore life of gleaming entertainment halls, open-plan offices, and vast warehouses ... well, it doesn't seem so bad. It's more than anyone else is offering. Zinnia never thought she'd be infiltrating Cloud. But now she's

undercover, inside the walls, risking it all to ferret out the company's darkest secrets. And Paxton, with his ordinary little hopes and fears? He just might make the perfect pawn. If she can bear to sacrifice him. As the truth about Cloud unfolds, Zinnia must gamble everything on a desperate scheme--one that risks both their lives, even as it forces Paxton to question everything about the world he's so carefully assembled here. Together, they'll learn just how far the company will go ... to make the world a better place. Set in the confines of a corporate panopticon that's at once brilliantly imagined and terrifyingly real, *The Warehouse* is a near-

future thriller about what happens when Big Brother meets Big Business--and who will pay the ultimate price.-

THE GUARDIAN “A thrilling tour of potential cosmic doomsdays....Mack’s infectious enthusiasm for communicating the finer points of cosmological doom elevates *The End of Everything* over any other book on the topic.” —The Wall Street Journal “I found it helpful—not reassuring, certainly, but mind-expanding—to be reminded of our place in a vast cosmos.” —James Gleick, *The New York Times Book Review* From one of the most dynamic rising stars in astrophysics, an accessible and eye-opening look at five ways the universe could end, and the mind-blowing lessons each scenario reveals about the most important concepts in cosmology. We know the universe had a beginning. With the Big Bang, it expanded from a state of unimaginable density to an all-encompassing cosmic fireball to a simmering fluid of matter and energy, laying down the seeds for everything from black holes to one rocky planet orbiting a star near the edge of a spiral galaxy that happened to develop life as we know it. But what happens to the universe at the end of the story? And what does it mean for us now? Dr. Katie Mack has been contemplating these questions since she was a young student, when her astronomy professor informed her the universe could end at any moment, in an

instant. This revelation set her on the path toward theoretical astrophysics. Now, with lively wit and humor, she takes us on a mind-bending tour through five of the cosmos's possible finales: the Big Crunch, Heat Death, the Big Rip, Vacuum Decay (the one that could happen at any moment!), and the Bounce. Guiding us through cutting-edge science and major concepts in quantum mechanics, cosmology, string theory, and much more, *The End of Everything* is a wildly fun, surprisingly upbeat ride to the farthest reaches of all that we know.

After the World Ended 18thwall Productions

The world is a museum

of fragile, curious things. In this collection of eighteen of her very best stories, Hannah Lackoff takes you on a guided tour of the marvelous: a ranch which held out, for years, believing the apocalypse had consumed the world (and the man who discovered them); twin sisters inseparable by eye or death; the life of a queen and the many lives of a mirror, mirror on the wall; wrong numbers on the restaurant wall and a small cabin in the woods, near your home, where the dead never dare to stay dead. Hannah Lackoff, like so many great authors before her, settles in with the bones with old stories, clichéd tales, and urban legends and builds them into her

exhibits. They are alive again, and demand your attention. Step into her museum, won't you? Hannah Lackoff's work has been nominated for the Pushcart Prize and the storySouth Million Writers Award and has been published or is upcoming in Spark, Pinbal, Kaleidotrope, New Myths, 10,000 Tons of Black Ink, and 10,000 Tons of Black Ink-Best of Volume II, and others. Her work has been preformed at Wheaton College.

And where there is no mercy. Read the first book in the critically acclaimed, three-time Hugo award-winning trilogy by NYT bestselling author N. K. Jemisin.

The Living Sea of

Waking Dreams

A novel *Vintage*

From the acclaimed Booker Prize-winning author comes a dazzling novel of family, love and love's disappointments. Anna's aged mother is dying. Condemned by her children's pity to living, subjected to increasingly desperate medical interventions, she turns her focus to her hospital window, through which she escapes into visions of horror and delight. When Anna's finger vanishes and a few months later her knee disappears, Anna too feels the pull of the window. She begins to see that all around her, others are similarly vanishing, yet no one else notices. All Anna can do is keep her mother alive. But the

window keeps opening wider, taking Anna and the reader ever deeper into an eerily beautiful story of grief and possibility, of loss and love and orange-bellied parrots. Hailed on publication in Australia as Richard Flanagan's greatest novel yet, *The Living Sea of Waking Dreams* is a rising ember storm illuminating what remains when the inferno beckons: one part elegy, one part dream, one part hope.

The Road *Vintage*

NATIONAL BESTSELLER

• WINNER OF THE
PULITZER PRIZE • A

searing, post-apocalyptic novel about a father and son's fight to survive, this "tale of survival and the miracle of goodness only adds to McCarthy's stature as a living master. It's gripping, frightening and, ultimately, beautiful" (San Francisco Chronicle). A father and his son walk alone through burned America. Nothing moves in the ravaged landscape save the ash on the wind. It is cold enough to crack stones, and when the snow falls it is gray. The sky is dark. Their destination is the coast, although they don't know what, if anything, awaits them there. They have

nothing; just a pistol to defend themselves against the lawless bands that stalk the road, the clothes they are wearing, a cart of scavenged food—and each other. The Road is the profoundly moving story of a journey. It boldly imagines a future in which no hope remains, but in which the father and his son, "each the other's world entire," are sustained by love. Awesome in the totality of its vision, it is an unflinching meditation on the worst and the best that we are capable of: ultimate destructiveness, desperate tenacity, and the tenderness that keeps two people alive in the face of total devastation.

SuperMars

In *Humans Are Not From Earth*, ecologist and environmentalist Dr. Ellis Silver proved we couldn't have evolved on this planet. Now he looks at where we really came from - and where we might be heading. A Mars-like planet would suit us better than the Earth, so why did we end up here, on the wrong planet? Could there be

another planet Mars in another solar system or another galaxy? Could our ancestors still be living there? Could we find it and live there too? We only have a few hundred million years left on Earth. As the Sun grows hotter, the plants will die and the planet will become uninhabitable. Mars could become our home for the next five billion years. In fact, it will have to - we have no choice. But when the Sun expands into a red giant and consumes the inner planets, Mars will become red hot. And then what? This far-reaching book looks at our real history, including our evolution on another planet and our arrival on Earth, and the many changes we've undergone since

we settled here. There's a detailed comparison of Earth, Mars, and our original home planet. And then we take a fascinating look at our possible future, from terraforming Mars, colonizing frozen moons, and building artificial worlds, to planet-hopping in other star systems, and (maybe) surviving the end of the universe.
