The Center for Sustainable Nanotechnology

Nanotechnology offers, for the first time, tools to develop new industries based on cost-effective and cost-efficient economies, thus seriously contributing to a sustainable economic growth. Nanotechnology is a broad term typically used to describe materials and phenomena at nanoscale, i.e., on the scale of 1 billionth to several tens of billionths of a meter (see Fig. 1). However, it specifically implies not only the miniaturization but also the precise manipulation of atoms and molecules ...
