Objective Knowledge by Karl Popper

Guided by his belief that the academic owes the public a lucid style, Popper crisply argues for realism, fallibilism, and verisimilitude in Objective Knowledge, a compilation of essays first published in 1972. Essay by essay, the philosopher charts the conditions for the growth of scientific or objective knowledge, which he frames as a peculiarly human invention akin to the spider's web.

Logical positivism, later called logical empiricism, and both of which together are also known as neopositivism, was a movement in Western philosophy whose

central thesis was the verification principle (also known as the verifiability criterion of meaning). This theory of knowledge asserted that only statements verifiable through direct observation or logical proof are meaningful.
