## **Introduction to basic troubleshooting commands within ...**

Linux is an operating system, it is just like Windows and Mac OS X. Operating system is a software that leverages hardware of the devices such as the laptop, desktop or tabs to the most. In a simple way, we can say the operating system is a bridge between the software and the hardware.

## **Introduction to Linux | Components & Characteristics of Linux**

The command shell is an application that reads command lines from the keyboard and passes them to the Linux operating system to be executed. When you login to a remote Linux system, using a tool like ssh, you will

automatically be connected to a shell. Your computing session is kept separate from other user's computing sessions, because they are "enclosed" in a "shell".
