Influence Surface Integrity Of Some Machined Aerospace

The overall performance of a gear system is intimately linked to the surface integrity of the gear surfaces. This usually implies that smooth and fully functional performance for an extended service life at high loads requires an improved surface durability. Surface durability is affected most notably by wear and fatigue resistance.

Influence Surface Integrity Of Some Machined Aerospace

Surface integrity (SI) reveals the influence of surface properties and condition upon which materials are likely to perform. It has long been known that the method of surface finishing and the complex combination of surface roughness, residual stress, cold work, and even phase transformations strongly influence the service behavior of manufactured parts as fatigue and stress corrosion.

Surface Integrity – Definition and Importance in ...

Surface finish is one of the most relevant aspects of machining operations, since it is one of the principle methods to assess quality. Also, surface finish influences mechanical properties such as fatigue behavior, wear, corrosion, etc.
