Critical Keywords for Big Data *MIT Press*
Scholars from a range of disciplines interrogate terms relevant to critical studies of big data, from abuse and

aggregate to visualization and vulnerability. This pathbreaking work offers an interdisciplinary perspective on big data, interrogating key terms. Scholars from a range of disciplines interrogate concepts relevant to critical studies of big data--arranged glossary style, from from abuse and aggregate to visualization and vulnerability--both challenging conventional usage of such often-used terms as prediction and objectivity and introducing such unfamiliar ones as overfitting and copynorm. The contributors include both leading researchers, including N. Katherine Hayles, Johanna Drucker and Lisa Gitelman, and such emerging agenda-setting scholars as Safiya Noble, Sarah T. Roberts and Nicole Starosielski.

Teaching Professional and Technical Communication

A Practicum in a Book *University Press of Colorado*

Teaching Professional and Technical Communication guides new instructors in teaching professional and technical communication (PTC). The essays in this volume provide theoretical and applied discussions about the teaching of this diverse subject, including relevant pedagogical approaches, how to apply practical aspects of PTC theory, and how to design assignments. This practicum features chapters by prominent PTC scholars and teachers on rhetoric, style, ethics, design, usability, genre, and other central concerns of PTC programs. Each chapter includes a scenario or personal narrative of teaching a particular topic, provides a theoretical basis for interpreting the narrative,

illustrates the practical aspects of the approach, describes relevant assignments, and presents a list of questions to prompt pedagogical discussions. Teaching Professional and Technical Communication is not a compendium of best practices but instead offers a practical collection of rich, detailed narratives that show inexperienced PTC instructors how to work most effectively in the classroom. Contributors: Pam Estes Brewer, Eva Brumberger, Dave Clark, Paul Dombrowski, James M. Dubinsky, Peter S. England, David K. Farkas, Brent Henze, Tharon W. Business and Technical Communication Challenges in the Public Sphere

Posthuman Praxis in Technical Communication *Routledge*

This collection, aimed at scholars, teachers, and practitioners in technical communication, focuses on the praxis-based connections between technical communication and theoretical movements that have emerged in the past several decades, namely new materialism and posthumanism. It provides a much needed link between contemporary theoretical discussions about new materialisms and posthumanism and the practical, everyday work of technical communicators. The collection insists that where some theoretical perspectives fall flat for practitioners, posthumanism and new materialisms have the potential to enable more effective and comprehensive practices, methodologies, and pedagogies.

The St. Martin's Bibliography of Business and Technical Communication *Bedford/st Martins*

Technical and Business Communication in Two-year Programs *National Council of Teachers*

Designed chiefly for the growing number of technical and business writing teachers in two year colleges, this collection of articles helps teachers understand technology and business students so that they can teach courses that satisfy the writing needs of those students. Written by practicing teachers or writers, the articles offer viewpoints on central issues. Principal assignments in freshman and sophomore courses in technical and business writing are given primary emphasis. Because of their multidisciplinary orientation, many of the selections are presented as resources for teachers in writing-across-the-curriculum programs. The articles are divided into six parts, arranged essentially in the order that teachers would use the materials. Each part addresses a central concern of teaching technical and business communication in two year programs: (1) preparing to teach the subject for the first time, (2) designing the basic course, (3) broadening the basic course or designing a program, (4) developing classroom strategies, (5) constructing effective assignments, and (6) teaching report writing. The book ends with an extensive bibliography of resources designed to help teachers of technical and business writing grow as

professionals. (HTH)

Citizenship and Advocacy in Technical Communication

Scholarly and Pedagogical Perspectives *Routledge*

In *Citizenship and Advocacy in Technical Communication*, teachers, researchers, and practitioners will find a variety of theoretical frameworks, empirical studies, and teaching approaches to advocacy and citizenship. Specifically, the collection is organized around three main themes or sections: considerations for understanding and defining advocacy and citizenship locally and globally, engaging with the local and global community, and introducing advocacy in a classroom. The collection covers an expansive breadth of issues and topics that speak to the complexities of undertaking advocacy work in TPC, including local grant writing activities, cosmopolitanism and global

transnational rhetoric, digital citizenship and social media use, strategic and tactical communication, and diversity and social justice. The contributors themselves, representing fifteen academic institutions and occupying various academic ranks, offer nuanced definitions, frameworks, examples, and strategies for students, scholars, practitioners, and educators who want to or are already engaged in a variegated

range of advocacy work. More so, they reinforce the inherent humanistic values of our field and discuss effective rhetorical and current technological tools at our disposal. Finally, they show us how, through pedagogical approaches and everyday mundane activities and practices, we (can) advocate either actively or passively.
