### **The Respiratory System - The UK Online**

The cells of the human body require a constant stream of oxygen to stay alive. The respiratory system provides oxygen to the body's cells while removing carbon dioxide, a waste product that can be lethal if allowed to accumulate. There are 3 major parts of the respiratory system: the airway, the lungs, and the muscles of respiration.

### **Respiratory System | Interactive Anatomy Guide**

The respiratory system works closely

with the cardiovascular system to maintain a supply of oxygen to the working muscles. How does oxygen get to our muscles? Air passes through the nasal cavity and then on to the trachea. The trachea splits into two tubes called bronchi (each one is called a 'bronchus'), with one going to each lung.

### **Structure & Function of the Respiratory System**

The respiratory system (also respiratory apparatus, ventilatory system) is a biological system consisting of specific organs and structures used for gas exchange in animals and plants. The anatomy and physiology that make this happen varies greatly, depending on the size of the organism, the environment in which it lives and its evolutionary

history.
