Abstract: Multi-agent systems (MASs) have received tremendous attention

from scholars in different disciplines, including computer science and civil engineering, as a means to solve complex problems by subdividing them into smaller tasks. The individual tasks are allocated to autonomous entities, known as agents.

Multi-Agent Systems: A Survey - IEEE Journals & Magazine

As a computational paradigm, multi-agent systems (MASs) provide a good solution for distributed control. In this paper, MASs and applications are discussed.

Multi-agent systems and their applications

Multi-agent systems is one paradigm, derived from the distributed artificial intelligence and artificial life fields, that allows an alternative way to design distributed control systems based on autonomous and cooperative agents, exhibiting modularity, robustness, flexibility, adaptability and re-configurability.

Multi-agent Systems in Industry: Current Trends & Future ...

Agents and multi-agent systems are related to a modern software paradigm which has long been recognized as a promising technology for constructing autonomous, complex and intelligent systems.

KES-AMSTA-21 | International Conference on Agent and Multi ...

Introduction Multi-agent systems (MAS) are a core area of research of modern artificial intelligence. A multi-agent system consists of multiple decision-making agents which interact in a

shared environment to achieve common or conflicting goals. An abundance of applications and problems can be usefully modelled and analysed using MAS methodology.

This volume highlights new trends and challenges in research on agents and the new digital and knowledge economy, and includes 23 papers classified into the following categories: business process management, agent-based modeling and simulation, and anthropic-oriented computing. All papers were originally presented at the 11th International KES Conference on Agents and Multi-Agent Systems – Technologies and Applications (KES-AMSTA 2017) held June 21–23, 2017 in Vilamoura, Algarve, Portugal.

Agent and Multi-Agent Systems: Technology and Applications ...

A multi-agent system (MAS or "self-organized system") is a computerized system composed of multiple interacting intelligent agents [citation needed]. Multi-agent systems can solve problems that are difficult or impossible for an individual agent or a monolithic system to solve. Intelligence may include

methodic, functional, procedural approaches, algorithmic search or reinforcement learning.

Multi-agent system - Wikipedia

Multi-Agent systems creates Emergent Intelligence as Demand Agents and Resource Agents negotiate the allocation of resources to demands. Enables rapid rescheduling of the affected part of the schedule when a Disruptive event affects the operation. Distributed decision making does not require extensive computational power and is very reliable.
