The instrumentation part of a piping and instrumentation diagram will be developed by an instrumentation engineer.

Instrumentation engineering is the engineering specialization focused on the principle and operation of measuring instruments that are used in design and configuration of automated systems in areas such as electrical and pneumatic domains, and the control of quantities being measured.

Instrumentation - Wikipedia

Summary. We develop measurement capabilities and protocols to validate and advance the science of Raman spectroscopy and work to establish NIST as a unique resource to the academic, industrial, and the National Metrology communities for such measurements. Working collaboratively, the ultimate goal is to develop Raman spectroscopy into a quantitative, SI-traceable technique critical for many applications including sensing, security and forensics.
