Active Perception and Robot Vision (NATO Asi Series ...

Action and perception are tightly coupled. This has been developed most comprehensively with respect to vision (active vision) where an agent (animal, robot, human, camera mount) changes position to improve the view of a specific object, or where an agent uses movement to perceive the environment (e.g., a robot avoiding obstacles).

Active perception - Wikipedia

As outlined in a research paper presented at the 2019 International Conference on Robotics and Automation (ICRA) in Montreal, the project’s active perception approach is the first in the world to focus on real-time grasping by stepping away from a static camera position or fixed data collecting routines.

'Active perception' could be a game changer for vision ...

Despite the recent successes in robotics, artificial intelligence and computer vision, a complete artificial agent necessarily must include active perception. A multitude of ideas and methods for how to accomplish this have already appeared in the past, their broader utility perhaps impeded by insufficient computational power or costly hardware.
