Localization refers to the relationship between the anatomical structures of the brain and their corresponding psychological or behavioral functions. Throughout the history of neuropsychology, there has been considerable debate over how localized mental functions truly are. By the mid-20th century, a formidable amount of evidence strongly supported the "modularity hypothesis" that psychological functions such as language and memory reside in specific neuroanatomical areas.

Prior work has shown that both group-level atrophy in clinical dementia syndromes and complex neurological symptoms in patients with focal brain lesions localize to brain networks. Here, we use a new technique termed 'atrophy network mapping' to test the hypothesis that single-subject atrophy maps in patients with a clinical diagnosis of Alzheimer's disease will also localize to syndrome-specific and symptom-specific brain networks.

Network localization of clinical, cognitive, and ...

Localization of clinical syndromes using DWI: two examples of the "capsular" warning syndrome. Oliveira-Filho J (1), Ay H, Koroshetz WJ, Buonanno FS. (1)Department of Neurology-Stroke Service, Blake 1291B, Massachusetts General Hospital, Harvard Medical School, 55 Fruit Street, Boston, MA 02114, USA. The capsular warning syndrome (CWS) is a subtype of transient ischemic attack characterized by its recurrent nature, absence of cortical signs, and high probability of early capsular stroke.

Localization of Clinical Syndromes Using DWI: Two Examples ...

The mechanistic interpretation of network localization remains unclear. One possibility is that clinical symptoms in neurological diseases can result from dysfunction in a connected but undamaged brain region through a mechanism termed diaschisis (Carrera and Tononi, 2014). Alternatively, network localization may suggest that a complex symptom localizes to the interactive functioning of the entire network, rather than any specific location or node within that network.

Network localization of clinical, cognitive, and ...

Localization of stroke syndromes Three steps 1.Clinical localization of the site of the lesion. 2.Identifying the vascular territory and the vessel involved. 3.Correlating with the imaging findings. 3. Clinical localization of stroke syndromes Prerequisites 1.Functional anatomy of brain. 2.Blood supply to the different parts of brain. 4.

Focal epilepsies of childhood, including benign epilepsy of childhood with centrotemporal spikes and Panayiotopoulos syndrome, are of unknown cause but may have a genetic component. The causes, clinical manifestations, and electroencephalographic features of the localization-related epilepsies are reviewed here.

REFERENCES - Evidence-Based Clinical Decision Support at ...

The localization of electrographic seizure activity at seizure onset and bradycardia onset was identified in all patients. In addition, we performed a comprehensive review of the ictal bradycardia literature focusing on localization of seizure activity in ictal bradycardia cases.

The ictal bradycardia syndrome: localization and ...

All three of the syndromes with linkage evidence are generalized epilepsies, in which seizures are presumed to involve the entire brain from the outset^{11,12}. Most localization-related (partial or focal) epilepsies¹², in which seizures begin in a specific brain region, are assumed to be nongenetic.
