Center Of The Universe A

The universe, in fact, has no center. Ever since the Big Bang 13.7 billion years ago, the universe has been expanding.

But despite its name, the Big Bang wasn't an explosion that burst outward from...

Where Is the Center of the Universe? | Live Science

The center of the Universe is a concept that lacks a coherent definition in modern astronomy; according to standard cosmological theories on the shape of the universe, it has no center. Historically, different people have suggested various locations as the center of the Universe. Many mythological cosmologies included an axis mundi, the central axis of a flat Earth that connects the Earth, heavens, and other realms together. In the 4th century BCE Greece, philosophers developed the geocentric mo

History of the center of the Universe - Wikipedia

According to all current observations, there is no center to the universe. For a center point to exist, that point would have to somehow be special with respect to the universe as a whole. Let us think about all the different types of effects that could create a center. First, if an object is rotating, you can define a center of rotation.
