Managing Foodservice

Operations: A Systems Approach for ...

The international food service industry provides millions of meals a day in a wide variety of types of food service operation. For managers in food and beverage operations, skills in marketing, merchandising, staff management, team development, training, customer relations, financial management and operational management are necessary for the management of both the service sequence (delivery) and the customer process (experience), and ultimately for the survival of the business.

1 Food and beverage operations

and management

Managing food safety procedures. You must put in place food safety management procedures based on the principles of Hazard Analysis and Critical Control Point (HACCP). HACCP is a system that helps you identify potential food hazards and introduce procedures to make sure those hazards are removed or reduced to an acceptable level.
