14.1: What is Correct Reasoning? - Social Sci LibreTexts

Logic is the science of truth and tries to discover the truth about truth. philo—love of, affinity for, liking of. Others say that logic is concerned with thought, and thus tries to discover the “laws of thought”. Logic explains what people ought to think. It tells us what is right thinking.

Logic - SlideShare

" Reasoning could be either correct or incorrect " (Wesley, Pg 14). Reasoning is correct if the premises provide good evidence for the truth of the conclusion inferred from them; otherwise the process of reasoning will be

incorrect. Correctness and incorrectness is the central problem of reasoning in which logic deals. .

FREE Reasoning Essay

In simple words, logic is “the study of correct reasoning, especially regarding making inferences.” Logic began as a philosophical term and is now used in other disciplines like math and computer science. While the definition sounds simple enough, understanding logic is a little more complex.

Examples of Logic: 4 Main Types of Reasoning

Logic is the study of the principles of correct reasoning. Metaphysics is the study of the most general features of

reality, such as existence, time, the relationship between mind and body, objects and their properties, wholes and their parts, events, processes, and causation. Don't use plagiarized sources.
