Neural, Cognitive and Behavioral Sciences. Study and research in the cognitive sciences focus on ways that the brain's physical qualities, intelligence processes, behavior and communication interconnect. Through the study of processes such as learning, language, decision making and memory, faculty and students gain new knowledge that can be used to address issues in education, health care, technologies, training and intervention.

Neural, Cognitive and Behavioral Sciences | College of Science

The U.K.'s National Health Service describes Cognitive Behavioral Therapy as a "therapy that can help you manage your problems by changing the way you think and behave." Cognitive Behavioral Therapy is based on the premise that thoughts, feelings, physical sensations, and even behavior are all interconnected. A mental health practitioner using this type of therapy will view some or all of the symptoms of a mental health issue as the result of imbalances in the ways a patient's ...
