Orcad Constraint Driven Design Flow

Capturing and meeting all the constraints in your PCB design doesn't have to be a manual process. You need the confidence that you're meeting your design rules and achieving your design goals throughout the entire design process, all the way to fabrication. With a constraint-driven design flow, you can easily capture your design rules and visually verify that they're being met in real-time as you design so you can get your designs done faster and with less stress at sign off.
