Introduction to Sensors and Transducers, Differences ...

The main difference between a sensor and a transducer is that a sensor senses the difference or change in the environment they are exposed to and gives an output in the same format where as a transducer takes a measurement in one form and converts it to another for example, a measurement which is not electrical and converts it into an electrical signal.

Sensors And Transducers Third Edition [PDF]

PRINCIPLES OF SENSORS & TRANSDUCERS • Linearity • The relationship between output and input is a key parameter for sensors and transducers. • Ideally there should be a straight line relationship so that equivalent changes in input produce the same order of change in output no matter where within the sensor’s range these occur.
