Example 7: Reactivity with water is a chemical property associated with a chemical change. Key Questions 1. Make a list of the physical properties that are identified in the Model. 2. What are the common features of physical properties represented in the ...

Physical and Chemical Properties

A physical change occurs when only the form or shape of the matter changes. An example is adding sugar to iced tea, the sugar may disappear, but you know that the sugar is still there by the sweet taste. A chemical change occurs when a substance changes into a different substance and the identity of the matter changes.

Physical And Chemical Properties Pogil Answer Key

Scientists can observe physical properties without changing the composition of the substance, whereas chemical properties describe the tendency of a substance to undergo chemical changes (chemical reactions) that change its chemical

composition. Physical properties can be intensive or extensive. Intensive properties are the same for all samples; do not depend on sample size; and include, for example, color, physical state, and melting and boiling points. Extensive properties depend on the ...
