Valve Selection based on Service

Characteristics. Valve selection is dependent on the characteristics of the services as follows. Fluid type; Fluid characteristics; Pressure and temperature limitations; Operation and maintenance requirements; 1. Fluid Type: The fluid being handled should be classified as follows, Liquid (including Two-Phase) Gas; Steam; Slurry; Solids; 2.

Selection of Valves: Valve Selection Procedure - What Is ...

Soft seated valves should normally be selected only for clean service. Soft seated block valves, such as ball valves, lined plug valves, soft seated gate valves, and butterfly valves can provide a good tight

shut off on gas or liquid when new. Hard metal seated valves should normally be selected if the service is other than clean. 2.

GUIDANCE ON VALVE TYPE SELECTION - b.ricardo

Valves are available with a wide variety of valve bodies in various styles, materials, connections and sizes. Selection is primarily dependent on the service conditions, the task, and the load characteristics of the application. The most common types are ball valves, butterfly valves, globe valves, and gate valves.

Control Valve Basics: Sizing and Selection

$C_v = (\text{Flow}) \times m$
(Specific gravity of the media at flowing

temperature/pressure drop)^{1/2}. A common mistake is calculating too high of a C_v by using the maximum flow rate, which results in selection of an oversize valve. The range of flow (min, max and mean flow rates) should be utilized to properly size the valve.

How to Select the Right Valve for Your Application ...

To assist in selecting the proper valve for your application, we recommend two approaches. First, if you know the valve series that meets your needs, you can go directly to the appropriate page as listed in the Numerical Listing, or the Main Index.
