Optics In The Age Of

According to received historiography, the fundamental issue in eighteenth-century optics was whether light could be understood as the emission of particles, or as the motion of waves in a subtle medium. Moreover, the emission theory of light was supposed to have been dominant in the eighteenth century, backed by Newton's physical arguments.

History of Optics and Lenses. Ever since the first ancient scientists started experimenting and trying to decipher the secrets of life, universe and the world we live in, one specific question became apparent to them – what is light, how does it travel and how can we take advantage of its properties. Answers to that question started appearing during the life of the great Ancient Egypt and Mesopotamia with the creation of first crude lenses.
