(PDF) Sustainable resource governance in global production ...

Despite the transnationality of global production networks, the emergence of these historically novel industrial systems does not imply a definite shift in the locus of economic governance from states to firms. As the experience of the Asia-Pacific resource networks attests, global production networks are to a large degree privately governed, and are organised through the sets of inter-firm relationships that regulate and manage the functional integration between firms.

Governing Global Production | SpringerLink

Sustainable resource governance in global production networks – challenges for human geography. Transnational debates, for instance on the finiteness of fossil resources and their harmful effects on the climate, are often regarded as interdisciplinary challenges in the social and natural sciences. By contrast, in the past two decades, notably in the 2000s, geography appears to have been forgetful of resources.

Sustainable resource governance in global production ...

Global Production Networks. A global production network is one whose interconnected nodes and links extend spatially across national boundaries and, in so doing, integrates parts of disparate national and subnational territories". GPN frameworks combines the insights from the global value chain analysis, actor-network theory and literature on Varieties of Capitalism. GPN provides a relational framework that aims to encompass all the relevant actors in the production systems.
