Using Ldap Cisco - ciclesvieira.com.br

Filter and Attribute can a bit challenging to an LDAP novice, as the Cisco Configuration Guides don't really explain the options that well. The default Filter setting is "cn=\$userid". This assumes the schema defines the user as an object with a common name (cn), and looks for this object in the container of your Base DN above.

Configuring LDAP Authentication with Cisco APIC Controller

The example configurations are set according to default settings of Yeastar S-Series VoIP PBX LDAP server. You can

use the following settings as a starting point and adjust the filter and display attributes according to your needs. Log in the Cisco SPA phone web interface, click Admin Login and advanced to log in as an administrator.

LDAP Configurations on Cisco SPA Phone

LDAP attribute maps provide a method to cross-reference the attributes retrieved from a server to Cisco attributes supported by the security appliances. When a user authenticates a security appliance, the security appliance, in turn, authenticates to the server and uses the LDAP protocol to retrieve the record for that user.
