Lea, Concurrent Programming in Java: Design Principles and ...

The first class, which one need's to make a java application concurrent, is java.lang.Thread class. java.lang.Thread class is

responsible for all concurrency concepts in Java programming language. After this we have java.lang Runnable interface to abstract the thread behavior out of the thread class. Other class which we will need to build an advanced application will be used from the java.util.concurrent package added in Java 1.5. Now with that, we have reached a new question which is: Is ...
