Positive legionella samples have risen by 20% . More worryingly, the rate of detection for positive legionella samples have also risen by around 20% year on year since April, in conjunction with the period of low occupancy. Tom continues: "Legionella is a ticking-time bomb in underused buildings if water systems are allowed to stagnate.

Action required to prevent legionella issues as water ...

Tom continued: 'Legionella is a ticking-time bomb in underused buildings if water systems are allowed to stagnate. Where maintenance has been neglected over lockdown, build-up of biofilm in the system provides essential nutrients to support the growth of harmful pathogens, exacerbating the problem - this could explain why we are 20% more likely to find positive legionella samples this year ...
