Craniofacial Surgery Craniofacial surgery is used to correct a range of congenital and acquired abnormalities of the skull, face, and jaws. In some cases, surgery is needed to correct major functional problems – for example, to create more space inside the skull to enable the brain

to grow, or to provide better protection for prominent eyes, or to make breathing and/or feeding easier.

Craniofacial Surgery | BAPRAS

Centre for Craniofacial & Regenerative Biology. Our research goes beyond the mouth. If we understand how the entire face and head forms, we can repair damage and regenerate cells. If we unravel the causes of diseases, we can treat patients successfully. If we solve these problems, our discoveries will improve health worldwide.
