Voice Restoration After Total Laryngectomy

Voice restoration in the absence of a functional larynx has been reported for over 150

years. 1 The first known description of a laryngeal prosthesis was by Czermak in 1859 who reported voice production after diverting airflow from a tracheal cannula through a reed-containing tube to the mouth in a patient with complete laryngeal stenosis. 2 Billroth performed his first laryngectomy in 1873 and his assistant, Gussenbauer, outfitted the patient with a custom speech apparatus; a reed-like ...

The electrolarynx: voice restoration after total laryngectomy

Interestingly, one of the earliest attempts to “surgically” restore voice following total laryngectomy was performed in 1931 by a

patient, who used a red hot ice pick to self-inflict a tiny “puncture” tract through the posterior wall of the permanent tracheostoma in his neck into the hypopharynx.[14]

Current Status of Voice Restoration Following Total ...

Voice prosthesis. A voice prosthesis is the most common way to restore speech after surgery. After surgery to remove the whole of your voice box (total laryngectomy), you are no longer able to speak in the normal way. But there are different ways you can communicate and learn to speak again. Types of communication
