Race, Empire, and English Language Teaching

Creating Responsible and Ethical Anti-Racist Practice *Teachers College Press*
This timely book takes a critical look at the teaching of English, showing how language is used to create hierarchies of cultural privilege in public schools across the country. Motha closely examines the work of four ESL teachers who developed anti-racist pedagogical practices during their first year of teaching. Their experiences, and those of their students, provide a compelling account of how new teachers might gain agency for culturally responsive teaching in spite of school cultures that often discourage such approaches. The author combines current research with her original analyses to shed light on real classroom situations faced by teachers of linguistically diverse populations. This book will help pre- and in-service teachers to think about such challenges as differential achievement between language learners and "native-speakers;" about hierarchies of languages and language varieties; about the difference between an accent identity and an incorrect pronunciation; and about the use of students' first languages in English classes. This resource offers implications for classroom teaching, educational policy, school leadership, and teacher preparation, including reflection questions at the end of each chapter.

The Routledge Handbook of English Language Teaching is the definitive reference volume for postgraduate and advanced undergraduate students of Applied Linguistics, ELT/TESOL, and Language Teacher Education, and for ELT professionals engaged in in-service teacher development and/or undertaking academic study. Young English Language Learners

Current Research and Emerging Directions for Practice and Policy *Teachers College Press*
It is well known that the number of non-English speakers is on the rise in the United States. What is less well known is that the largest proportion of this population is children under the age of 5. These young English language learners (ELLs) often demonstrate achievement gaps in basic math and reading skills when they start school. How best to educate this important and growing preschool population is a pressing concern for policymakers and practitioners. The chapters in this important book provide up-to-date syntheses of the research base for young ELLs on critical topics such as demographics, development of bilingualism, cognitive and neurological benefits of bilingualism, and family relationships, as well as classroom, assessment, and teacher-preparation practices. Contributors: Linda M. Espinosa, Margaret Freedson, Claudia Galindo, Fred Genesee, Donald J. Hernandez, José E. Nájuez Sr., and Flora V. Rodríguez-Brown “This is a must-have for those who are working directly or indirectly with young English language learners.” —Olivia Saracho, University of Maryland, College Park, Maryland

How to Teach English

Asian English Language Classrooms

Where Theory and Practice Meet *Routledge*
The teaching of English in the Asian context is always challenging and dynamic because both teachers and learners have diverse linguistic and cultural backgrounds. Equally important, where English is not widely used outside the classroom, English language classrooms are an authentic site of learner engagement. For these reasons, for all those concerned with contemporary English language teaching (ELT) in Asia, Asian English Language Classrooms: Where Theory and Practice Meet, provides an account of theoretical orientations and practices in the teaching of English to multilingual speakers whose primary language is not English. While covering the fundamental ELT areas (e.g., the teaching of language skills, educational literature, the use of technology in ELT, the role of pragmatics in ELT, social psychology of the language classroom, and language classroom management) with which every language teacher and teacher trainer must be concerned, this volume showcases how particular orientations shape ELT practices. We believe that practicing English teachers must have a heightened awareness of the theory behind their practice. At the same time, the theoretical stance must be firmly anchored in actual classrooms. Containing newly commissioned chapters written by well-regarded and emerging scholars, this book will appeal not only to beginning teachers or teachers in training but also to established teachers around Asia where English is used as a lingua franca. If you are a student teacher of English or an English teacher who would like to see what other progressive teachers like you

are doing across Asia, this is the book you have been looking for.

State Assessment Policy and Practice for English Language Learners

A National Perspective Psychology Press

State Assessment Policy and Practice for English Language Learners: A National Perspective presents three significant studies, each examining a different aspect of states' strategies for including English language learners in state assessments. *An Analysis of State Assessment Policies Regarding Accommodations for English Language Learners; *A Survey and Description of Test Translation Practices; and *An Examination of State Practices for Reporting Participation and Performance of English Language Learners in State Assessments. With the rise in population of English language learners and the subsequent stepped-up legislative focus on this student population over the past decade, states have been challenged to include English language learners in state assessment programs. Until now, the little data available on states' policies and practices for meeting this challenge has been embedded in various reports and professional journals and scattered across the internet. This volume offers, for the first time, a focused examination of states' assessment policies and practices regarding English language learners. The three studies were supported by OELA, the U.S. Department of Education's Office of English Language Acquisition, Language Enhancement, and Academic Achievement for Limited English Proficient Students. State Assessment Policy and Practice for English Language Learners: A National Perspective is of interest to researchers and professionals involved with the assessment of English language learners; state- and district-level policy makers; and academics, teacher educators, and graduate students in a number of fields, including educational and psychological assessment, testing and measurement, bilingual education, English as a second language, and second language acquisition.

Assessing English Language Learners

Theory and Practice Routledge

Assessing English Language Learners explains and illustrates the main ideas underlying assessment as an activity intimately linked to instruction and the basic principles for developing, using, selecting, and adapting assessment instruments and strategies to assess content knowledge in English language learners (ELLs). Sensitive to the professional development needs of both in-service and pre-service mainstream teachers with ELLs in their classrooms and those receiving formal training to teach culturally and linguistically diverse students, the text is designed to engage readers in viewing assessment as a critical part of teaching appreciating that assessments provide teachers with valuable information about their students' learning and thinking becoming aware of the relationship among language, culture, and testing understanding the reasoning that guides test construction recognizing the limitations of testing practices being confident that assessment is an activity classroom teachers (not only accountability specialists) can perform Highlighting alternative, multidisciplinary approaches that address linguistic and cultural diversity in testing, this text,

enhanced by multiple field-tested exercises and examples of different forms of assessment, is ideal for any course covering the theory and practice of ELL assessment.

Non-native Educators in English Language Teaching *Routledge*

The place of native and non-native speakers in the role of English teachers has probably been an issue ever since English was taught internationally. Although ESL and EFL literature is awash, in fact dependent upon, the scrutiny of non-native learners, interest in non-native academics and teachers is fairly new. Until recently, the voices of non-native speakers articulating their own concerns have been even rarer. This book is a response to this notable vacuum in the ELT literature, providing a forum for language educators from diverse geographical origins and language backgrounds. In addition to presenting autobiographical narratives, these authors argue sociopolitical issues and discuss implications for teacher education, all relating to the theme of non-native educators in ETL. All of the authors are non-native speakers of English. Some are long established professionals, whereas others are more recent initiates to the field. All but one received part of the higher education in North America, and all except two of the chapters are at least partially contextualized in North America. Particularly relevant for non-native speakers who aspire to enter the profession, graduate students in TESOL programs, and teacher educators, the unique nature of this book's contributors and its contents will interest researchers and professionals in applied linguistics generally and in ELT, and all those who are concerned with the role of non-native speakers in English-language teaching.

Building Teacher Capacity in English Language Teaching in Vietnam

Research, Policy and Practice *Routledge*

This timely volume opens a window on issues related to English language education in Vietnam. The authors consider that teacher quality is the key factor to be considered if the national English language curriculum outcomes are to be achievable. Aiming to shed light on key issues recently observed in the Vietnamese landscape of English language education, it examines the complexity of the institutionalization of the standardized English proficiency policy, which has been in force since 2008. That policy uses the Common European Framework of References for Languages (CEFR) as the model to set the standards and levels of proficiency for teachers, learners and state employees. The book presents both the theoretical and practical aspects of the standardization movement in English language education. The contents comprise a series of extended research-based chapters written by experts of language-in-education policy and planning in and about Vietnam from a range of perspectives including teachers, English language curriculum developers, teacher educators and researchers. The rich coverage of the book includes current discussion on English language education in Vietnam ranging from policy to practice, making it highly relevant to English teachers, teacher educators, and scholars, in Vietnam and worldwide, who aspire to broaden their horizons and professionalism.

Color, Race, and English Language Teaching: Shades of Meaning is intended for researchers, professionals, and students in the field of English language teaching. The book is designed as a text for MATESOL programs and courses that deal with issues of language, culture, and teaching. Focus questions for each chapter are included to help readers apply aspects of the narratives to their own experience.

Primary School English-language Education in Asia

From Policy to Practice *Routledge*

"In Asia, English is no longer a foreign language but a key resource for education, government, business and the general public. Whereas thirty years ago, British and American experts believed that the best way to improve the quality of English teaching was to cancel any programs below the secondary level, Asian nations as well as European are now introducing English in primary school. But there are major obstacles to overcome: the training of enough local teachers or the hiring of English speakers, the preparation of suitable teaching materials, the development of useful tests, and the design of workable curriculums. The chapters in this book, written by leading English-teaching professionals in seven Asian countries and originally delivered at the 2010 annual conference of Asia TEFL which took place in Hanoi, Vietnam, describe and analyze national policies and how they are implemented. The coverage is wide: China with its huge number of students learning English, Japan working to make the transition from elementary to secondary school seamless, Singapore continuing to use English as medium of instruction for its multilingual population, Korea developing English education policies to recognize the increased role of English alongside the national language, India building on its colonial past to make English an economic resource, Vietnam fitting English into a program of national rebuilding, and Taiwan spreading its English teaching outside the national capital. This is not a report of the views of outside experts, but of local experiences understood by local scholars of international standing. Policy makers, educators, researchers and scholars will be able to gain valuable insights from Asian experts"--

From Language Skills to Literacy

Broadening the Scope of English Language Education Through Media Literacy *Routledge*

The narrowing of English language education curriculum in many contexts has negatively impacted classroom teaching and learning. High-stakes standardized testing, scripted curricula, and the commodification of English have converged to challenge socially meaningful classroom literacy instruction that promotes holistic development. Although in different ways, these factors have shaped the teaching of English as both first and second language. How can English educators respond? This book argues that the first step is to take account of the broader policy, political and cultural landscape and to identify the key constraints affecting teachers, students and parents. These will set the broad parameters for developing local pedagogic approaches, while still recognizing the constraints that actively push against them. Using Singapore English language teaching as a case study, this book illustrates how this process can unfold, and how media literacy principles were vernacularized to design English classroom pedagogies that stretched the bounds of what is acceptable and possible in the local context.
