Computer-Automated Process Planning for World-Class ...

There are three tasks of manufacturing production planning: process planning, determining cutting conditions, and setting the time standards. To make the proper sequence the operations are documented on a form known as the route sheet. The use of computers for process planning is called as Computer Aided Process Planning or CAPP. There are two approaches for computer aided planning process ...

Computer Aided Process Planning (CAPP) Manufacturing ...

Generative process planning may be defined as a system that synthesizes process information in order to create a process plan for a new component automatically. Process plans are created from information available in a manufacturing database with little or no human intervention.

3 Main Types of Process Planning | Production

Generative Computer Aided Process Planning In generative process planning, process plans are generated by means of decision logic, formulas, technology algorithms, etc. Main aim is to convert a part from raw material to finished state. Input to the system includes the description of the part in the form of part code number. . 13.

Computer Aided Process Planning (CAPP)

Processing the process plan; Computer Aided Process Planning. Manufacturers have been following an evolutionary step to improve and computerize process planning in the following five stages: Stage I - Manual classification; standardized process plans. Stage II - Computer maintained process plans. Stage III - Variant CAPP. Stage IV - Generative CAPP

Process Planning, Process Planning and Design

Computer-aided process planning (CAPP) is the systematic determination of a set of steps by which a product can be manufactured in a cost-effective, competitive manner (Alting and Zhang, 1989). The most common approaches to CAPP are based on automated feature recognition (Weill et al., 1982 ; Shah et al., 1991 ; Babic et al., 2008 ; Xu et al., 2011) .
